

REVIEWS IN AGRICULTURAL SCIENCE

Dear alumnae and alumni,

This is a call for papers to invite you to submit review articles to the newly launched **REVIEWS IN AGRICULTURAL SCIENCE**, of which the first issue is scheduled to come out during the last quarter of the academic year 2012.

You remember those exiting days and nights of preparing the dissertation for doctor' s degree. Wasn' t the most proud chapter for youself the general introduction? Though the main body of the thesis must be published in the international journals, it is very rare to have an opportunity for young scientists to publish the contents of the general introduction in the thesis as a review article. This is one of the reasons we intend to publish the new journal, but the reviews addressing to your recent research are also welcome.

REVIEWS IN AGRICULTURAL SCIENCE is an open access online journal, which publishes reviews in a broad range of areas relevant to all aspects of agricultural sciences. All alumnae and alumni, students, and academic staff of The United Graduate School of Agricultural Science (RENDAI), Gifu University are invited to submit reviews in your specialized research fields.

REVIEWS IN AGRICULTURAL SCIENCE is freely available online for immediate worldwide open access to the full text of published articles. There are no subscription fees, and all interested readers will be able to freely access the journal online. The full text of all published articles will be made available on PubMed Central® immediately upon publication. To enable the journal to make all of its content open access, the article processing fee for each article accepted after peer review processing are covered by RENDAI for all authors.

Please visit the journal' s homepage and Instructions for Authors, for article submission, at the following website <http://www.xxxxxx.ac> or alternatively contact us by e-mail at ejournal@gifu-u.ac.jp for submission guidelines.

Because high-level and rigorous peer reviewing is a procedure fundamental to all scientific communication, we are seeking for qualified researchers to join the editorial team as an editor. We shall be greatly looking forward to your positive response in the matter.

EDITOR-IN-CHIEF

Makoto Mori (Shizuoka Univ)

Comparative endocrinology; Animal resource production

EDITORIAL ADVISOR

Fumiaki Suzuki (Gifu Univ)

Animal biotechnology; Regulation of biological functions

SECTION EDITORS

Satoshi Arai (Gifu Univ)

Agricultural economics; Plant production and management

Masateru Senge (Gifu Univ)

Irrigation and drainage; Agricultural and environmental engineering

Tsutomu Saito (Shizuoka Univ)

Applied entomology; Management of biological environment

Tohru Mitsunaga (Gifu Univ)

Cell constituents; Utilization of biological resources

Hideharu Ishida (Gifu Univ)

Glycotechnology; Smart material science

Akio Morita (Shizuoka Univ)

Plant nutrition; Regulation of biological functions

EDITOTIAL MANAGER

Tohru Suzuki (Gifu Univ)

Genome microbiology; Regulation of biological functions

Masayuki Yamashita (Shizuoka Univ)

Ecological genetics; Management of biological environment
